Orthopaedic clinics move to Kingston Hospital

The Trauma and Orthopaedics Service Line delivers high class, consultant led emergency and elective care. In order to provide a seamless patient pathway we have moved our clinics from Queen Mary’s Hospital to Kingston Hospital and our integrated community sites.

We deliver excellent outcomes and patient satisfaction remains consistently high. We run an weekly, innovative on call service for trauma with care delivered by consultants at all times with support from our training grade doctors, nursing staff and other allied healthcare professionals. We deliver world class Orthopaedic care to our patients and constantly develop our service. We have worked hard to ensure our waiting times are low to allow patients to see an appropriate clinician as soon as possible.

We deliver over 34,000 outpatient attendances per year, 2,500 elective and day case procedures and 2,300 emergency admissions.

The service line currently runs two wards: Cambridge and Canbury with additional beds provided into Claremont and the rest of Canbury as required.
