Christmas Decorations Competition

Kingston Hospital has been getting into the Christmas spirit once again, with all of our wards and departments taking part in our annual Christmas Decorations Competition. All entrants took to the task with great enthusiasm and made an amazing amount of effort. We want our patients and visitors to be able to enjoy the festive season, even while they are away from their families and homes, and our decorations help us share our Christmas spirit with them. Here are just a few of the creative decorations from around the Hospital.

Remind Me Care

Staff on Derwent Ward are revolutionizing care for patients with dementia by using a new unique piece of software to help understand their needs, likes and dislikes. Remind Me Care is bespoke reminiscence and family engagement software that helps create an e-collection of meaningful pictures and video that describe the habits and achievements that make everyone unique and help us deliver more informed care. The resulting collection of music and images constantly evolves as new responses are registered.

Kingston Hospital Charity Relaunch

Kingston Hospital Charity has relaunched with a new logo and graphic identity to help build greater awareness of its work and to support its fundraising. The charity's new identity will highlight its connections to the local community, and encourage people to support their local hospital.
